Summary

With over 3 years of experience as a Digital Product Manager and Electronic Platform Specialist at Nordic-Baltic Support, I have honed my skills in managing digital products and ensuring seamless platform functionality. My prior experience as a Data Entry Specialist at Nordic-Baltic Outsource has provided me with the discipline and attention to detail that is essential for success in the tech industry.

My unique educational experience has equipped me with a strong foundation in problem-solving and a keen understanding of technology, allowing me to excel in various roles throughout my career.

As a recent graduate of the Baltic Institute of Technology's FE Developer program, I have gained valuable expertise in Javascript, HTML, CSS, React.js. As a self-motivated and intellectually curious individual, I am eager to leverage my junior-level skills to create innovative web solutions.

Experience

Digital Product Manager

Nordic-Baltic Support

Dec 2021 - Aug 2022 (9 months)

- Oversaw the management of various digital products within our ecosystem, the one we developed internally and from partners.
- Collaborated closely with development teams to continuously enhance our platform's functionality, actively exploring the possibility of creating a proprietary SaaS solution.
- Engaged in productive discussions with business clients and customers, gathering requirements, and leveraging digital tools to create impactful marketing campaigns and automation.
- Demonstrated strong documentation skills, capturing detailed information on all tools and processes while also creating comprehensive learning materials for new team members, fostering knowledge sharing and efficient on-boarding.

Electronic Platform Specialist

Nordic-Baltic Support

Mar 2019 - Dec 2021 (2 years 10 months)

- Spearheaded the creation of an automated integration system, collaborating closely with developers, to streamline the process of receiving and validating product data from sellers on our platform.
- Implemented templates inspired by industry-leading platforms like Amazon, ensuring seamless data validation and allocation to appropriate categories, with the ability to address errors through manual intervention when necessary.
- Played a pivotal role in developing product management systems, merchandising tools, and an automatic size assignment tool, improving overall platform functionality and enhancing the customer experience.

- Additionally, facilitated effective communication between internal teams, business clients, and development teams, ensuring smooth collaboration and successful project delivery.

Data Entry Specialist

Nordic- Baltic Outsource

May 2015 - Mar 2019 (3 years 11 months)

- Ensured data accuracy and quality control for our e-commerce platform by meticulously reviewing and verifying product information, including images, measurements, descriptions, and links.
- Provided valuable suggestions to the development teams on automating and streamlining the data entry process, resulting in increased efficiency and reduced manual effort.
- Thrived in a fast-paced environment that demanded attention to detail and independence, requiring proactive research and problem-solving rather than relying on constant guidance.

Education

Baltic Institute of Technology

Javascript developer, Web Development

Nov 2022 - Apr 2023

Vytauto Didžiojo universitetas

Bachelor's degree, Physics

2010 - 2014
